- TypeScript
- Experience with Wordpress Theme Development

PROJECTS

Photoshop Mock-up to Dynamic Web Page - *https://davidjustice28.github.io/coalition-skilltest/*
- Converted a .psd file design to HTML.
- Used vanilla Javascript to make the page dynamic.

Carvana Website Clone - *https://davidjustice28.github.io/Carvana-Clone/*
- Cloned the Carvana.com homepage using only pure HTML & CSS.
- Incorporated Google Materials Icons

CV Builder - *https://github.com/Davidjustice28/cv-project*
- Users can enter contact info and both educational and previous work experience.
- Built with ReactJs; Utilized class components.

Calculator - *https://davidjustice28.github.io/calculator-2.0/*
- Calculator web application that computes the basic add, subtract, multiply, and divide functions.
- Utilize CSS Grid and Flexbox to layout page

Brokersphere - Referral Lead Web App for Realtors - *https://safe-atoll-04857.herokuapp.com/*
- Full Stack web application that allows realtors to find and share out of state referral leads.
- Stack includes NodeJS, Express, & MongoDB for the backend.
- Simple HTML,CSS, & JavaScript for frontend (Still finishing development)
- Users can signup to receive automated emails when a referral lead in their area is uploaded

Simple CRM - *https://davidjustice28.github.io/crm-project/*
- CRUD app built with only HTML,CSS, & JavaScript.
- Users can also add and delete reminders, favorite contacts, and search their client list by email or name.
- Desktop users receive notifications when a new contact or reminder is uploaded
